FHWA Approval of the August 2019  
Revisions to the FY 2019-2022 Statewide  
Transportation Improvement Program (STIP)

James M. Bass  
Executive Director  
Texas Department of Transportation  
125 E. 11th Street  
Austin, Texas 78701

Attention: Peter Smith

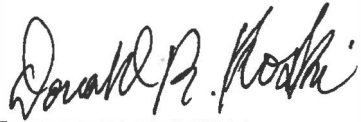

Dear Mr. Bass:

We reviewed the August 2019 revisions to the FY 2019-2022 STIP, transmitted with your September 4, 2019 letter and the performance measures (PM1/PM2/PM3). Based upon our review, the revisions to the FY 2019-2022 STIP are hereby approved subject to the enclosed comments. Please note STIP approval of projects that are not federally funded is not intended to provide federal endorsement or action.

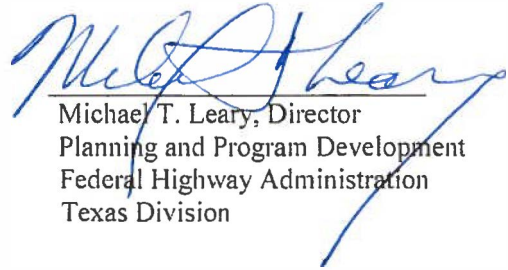

Additionally, in accordance with our October 21, 2015 letter, TxDOT has been utilizing estimated Develop Authority (DA) to demonstrate the availability of sufficient project funding for National Environmental Policy Act (NEPA) clearance actions for projects in rural portions of the State not consistent with the fiscally constrained STIP. This demonstration of funding availability has been provided to FHWA and FTA with the fiscal constraint documentation for new and amended STIPs. However, the August 2019 STIP Amendment Develop Authority Summary Sheet (copy enclosed) indicates an over programming of DA of approximately \$2.9 Billion. As TxDOT is unable to demonstrate fiscal constraint for DA projects, NEPA clearance actions for projects utilizing DA should not be completed, unless the project is consistent with a fiscally constrained MPO MTP and TIP.

Should you have any questions or concerns, please contact either Ms. Genevieve Bales of the FHWA Texas Division at (512) 536-5940 or Ms. Lynn Hayes of the FTA Region VI office at (817) 978-0565 for additional information.

Sincerely yours,

Donald R. Koski, Director  
Planning and Program Development  
Federal Transit Administration  
Region VI

Michael T. Leary, Director  
Planning and Program Development  
Federal Highway Administration  
Texas Division

**2019 August STIP Revisions  
Federal Comments**

	<b>District / MPO</b>	<b>CSJ Number</b>	<b>STIP comment</b>
1	General	Statewide Financials	Please clarify discrepancy in the FY 2019 Category 9 funding for CAMPO reflected in the August 2019 Quarterly STIP Revision Statewide Highway Financials and in the CAMPO August 2019 Quarterly STIP revision Highway Financial Summary.
2	General	Statewide Financials	Please clarify discrepancy in the FY 2019 CAT 3 - TDC funding for H-GAC reflected in the August 2019 Quarterly STIP Revision Statewide Highway Financials and in the H-GAC August 2019 Quarterly STIP revision Highway Financial Summary.
3	AMA / Rural	0066-02-034	Approved. Early STIP approval action effective 10/08/2019.
4	AUS / CAMPO	0114-02-108	Not Approved. The funding proposed for this project is noted as Category 9 - Transportation Alternatives Program (TAP). However, the supporting documentation does not indicate that the project was funded through a competitive process, as required for TAP funding. Also, additional documentation is required for PM2 and PM3. The MPO needs to provide an introduction of performance measures and identified targets adopted by the MPO for PM2 and PM3. Approval is withheld pending clarification of these items.
5	BMT / SERTPC	0028-13-135	Not Approved. Approval pending completion of the Transportation Conformity Determination for 2045 MTP and revised 2019-2022 TIP.
6	BMT / SERTPC	0200-16-020	Not Approved. Approval pending completion of the Transportation Conformity Determination for 2045 MTP and revised 2019-2022 TIP.
7	BMT / SERTPC	0739-02-140	Not Approved. Approval pending completion of the Transportation Conformity Determination for 2045 MTP and revised 2019-2022 TIP.
8	DAL / NCTCOG	0000-18-102	Approved. Subject to inclusion in the UPWP.
9	DAL / NCTCOG	0918-00-320	Approved. Early STIP approval action effective 09/26/2019.
10	DAL / NCTCOG	0918-46-318	Approved. Subject to inclusion in the UPWP.
11	DAL / NCTCOG	1017-01-015	Approved. Early STIP approval action effective 09/13/2019.
12	DAL / NCTCOG	1973-01-015	Approved. Early STIP approval action effective 09/13/2019.
13	ELP / EPMPO	2552-02-028	Not approved. Project change is not consistent with the current conformity.
14	FTW / NCTCOG	0902-00-248	Approved. Subject to inclusion in the UPWP.
15	FTW / NCTCOG	0902-00-250	Approved. Subject to inclusion in the UPWP.
16	HOU / H-GAC	0912-31-293	Not Approved. The Year of Expenditure (YOE) cost, Cost of Approved Phases and Funding by Category totals reflected in the H-GAC 2019-2022 TIP and the e-STIP project entry are inconsistent and inconsistent with the noted Federal, Local and Local Contribution funding. Approval is withheld pending clarification of YOE cost, Cost of Approved Phases and Funding by Category. Per clarification provided by H-GAC, project is consistent with H-GAC's conforming 2045 RTP.
17	HOU / H-GAC	0912-72-541	Approved. Per clarification provided by H-GAC, project is consistent with H-GAC's conforming 2045 RTP.

**2019 August STIP Revisions  
Federal Comments**

	<b>District / MPO</b>	<b>CSJ Number</b>	<b>STIP comment</b>
18	HOU / H-GAC	0980-02-018	Approved. Per clarification provided by H-GAC, project is consistent with H-GAC's conforming 2045 RTP.
19	HOU / H-GAC	MPO ID 7569	Approved. Project addresses Lynchburg Ferry as noted in H-GAC's 2019-2022 TIP and the e-STIP Project History. Also, per clarification provided by H-GAC, project is consistent with H-GAC's conforming 2045 RTP.
20	PHR / HCMPO	0255-07-140	Not approved. Early STIP action denied. Project description ("Rural Expressway Facility") is lacking adequate detail.
21	WFS / Rural	0195-01-116	Approved. Please clarify discrepancy regarding City as noted in the supporting documentation and in the E-STIP project entry. Early STIP approval action effective 10/01/2019. NOTE: Clarification concerning City noted in E-STIP provided by TxDOT on October 1, 2019.

# **AIR QUALITY STANDARDS ATTAINMENT STATUS**

## Attainment Status

The Beaumont-Port Arthur ozone maintenance area (Hardin, Jefferson, and Orange Counties) was redesignated from nonattainment to attainment-maintenance for the 1998 eight-hour ozone National Ambient Air Quality Standard (NAAQS), effective November 19, 2010. The area was initially designated attainment/unclassifiable for the subsequent 2008 and 2015 eight-hour ozone NAAQS and remains in attainment for both standards. When the 1997 eight-hour ozone NAAQS was revoked by the EPA, transportation conformity requirements for that standard were also revoked (effective April 6, 2015). Due to its designation as attainment/unclassifiable for the 2008 and 2016 eight-hour ozone NAAQS, the Beaumont-Port Arthur area has not been subject to transportation conformity requirements since 2015.

On February 16, 2018, the United States Court of Appeals for the District of Columbia Circuit issued an opinion in the case *South Coast Air Quality Management District v. EPA*, 882 F.3d 1138 (South Coast II). The case was a challenge to EPA's 2008 eight-hour ozone NAAQS state implementation plan (SIP) requirements rule (80 FR 12264), which revoked the 1997 eight-hour ozone NAAQS as part of implementing the more stringent 2008 eight-hour ozone NAAQS. The court's decision vacated parts of the EPA's 2008 eight-hour ozone NAAQS SIP requirements rule, including waiving requirements for transportation conformity for maintenance areas under the revoked 1997 eight-hour ozone NAAQS. In response to the South Coast II decision, the EPA published *Transportation Conformity Guidance for the South Coast II Court Decision* on November 29, 2018. The guidance document was published to assist affected areas as they reestablished compliance with transportation conformity requirements under the revoked 1997 eight-hour ozone NAAQS. Based on the November 2018 guidance, affected areas may demonstrate conformity if the following requirements are met:

- Use of latest planning assumptions;
- Interagency consultation;
- Fiscal constraint for the MTP and TIP; and
- Timely implementation of transportation control measures (TCM), if applicable.

**REVISED**

**Integration of Performance Measures into  
the SETRPC-MPO**

**Revised FY 2019-2022 Transportation  
Improvement Program**

## Introduction

Initiated as part of the Moving Ahead for Progress in the 21st Century (MAP-21) and continued in the Fixing America's Surface Transportation (FAST) Act, State Departments of Transportation (DOTs) and Metropolitan Planning Organizations (MPOs) are required to move towards a performance-based planning process with an emphasis on project selection based on specific planning factors. In the JOHRTS Metropolitan Transportation Plan (MTP) 2045 developed under FAST Act, the SETRPC-MPO focused on the following factors for selection of projects in its Fiscally-Constrained Project List:

- Safety: Ability to reduce potential crashes based on the Safety Improvement Index (SII) reduction factors for specific improvements
- Emergency Response: Identifies roadway improvements that enhance the provision of emergency services
- Intermodal Benefits: Ability to improve the flow of intermodal transport along roadways in the most cost-effective and safety conscious manner
- Mobility: Improvement in roadway Level-of-Service (LOS)

On May 27, 2016, the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) issued the Statewide and Nonmetropolitan Transportation Planning; Metropolitan Transportation Planning Final Rule. This regulation implements the transportation planning and transportation performance management provisions of MAP-21 and the FAST Act.

Pursuant with The Planning Rule, the Texas Department of Transportation (TxDOT) and each Texas MPO, including the SETRPC-MPO, must publish a System Performance Report for applicable performance measures in their respective statewide and metropolitan transportation plans and programs. The System Performance Report presents the condition and performance of the transportation system with respect to required performance measures, documents performance targets and progress achieved in meeting the targets in comparison with previous reports. Per the Planning Rule, the System Performance Report for the SETRPC-MPO REVISED FY 2019-2022 TIP is included for the required Safety (PM1), Bridge and Pavement Condition (PM2), Travel Time Reliability (PM3), and Transit Asset Management (TAM) performance measures and targets.

## Safety (PM1)

Effective April 14, 2016, the FHWA established the safety performance measures to carry out the Highway Safety Improvement Program (HSIP). These performance measures are:

1. Number of fatalities
2. Rate of fatalities per 100 million vehicle miles traveled
3. Number of serious injuries
4. Rate of serious injuries per 100 million vehicle miles traveled
5. Number of combined non-motorized fatalities and non-motorized serious injuries

Safety performance targets are provided annually by the States to FHWA for each safety performance measure. Current statewide safety targets address calendar year 2019 and are based on an anticipated

five-year rolling average (2015-2019). Texas statewide safety performance targets for 2019 are included in **Table 1**. The SETRPC-MPO adopted the Texas statewide safety performance targets on November 29, 2018.

**Table 1: Safety (PM1) Conditions and Performance**

2019 Safety Targets	Number of Fatalities (FARS / CRIS / ARF DATA)	Rate of Fatalities (FARS / CRIS / ARF DATA)	Number of Serious Injuries (FARS / CRIS DATA)	Serious Injury Rate (CRIS DATA)	Total Number of Non-Motorized Fatalities and Serious Injuries (FARS / CRIS DATA)
2015	3,582	1.39	17,110	6.63	2,036
2016	3,776	1.39	17,602	6.49	2,301
2017	3,726	1.36	17,546	6.39	2,148
2018	3,891	1.46	18,130	6.64	2,309
2019	3,980	1.47	18,367	6.60	2,394
2019 Target as a 5-Year Average	2,791	1.414	17,751	6.55	2,237.6

The SETRPC-MPO recognizes the importance of linking goals, objectives, and investment priorities to stated performance objectives, and that establishing this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the JOHRTS FY 2019-2022 TIP planning process directly reflects the goals, objectives, performance measures, and targets as they are available and described in other State and public transportation plans and processes, the Texas Strategic Highway Safety Plan (SHSP), the Texas Highway Safety Improvement Program (HSIP), the current statewide Texas Transportation Plan 2040 (TTP), and the current JOHRTS Metropolitan Transportation Plan – 2040.

- The Texas Strategic Highway Safety Plan (SHSP) is intended to reduce the number of fatalities and serious injuries resulting from motor vehicle crashes on public roads in Texas. Existing highway safety plans are aligned and coordinated with the SHSP, including the Texas Highway Safety Improvement Program (HSIP), MPO and local agencies' safety plans. The SHSP guides TxDOT, Texas MPOs, and other safety partners in addressing safety and defines a framework for implementation activities to be carried out across Texas.
- The TxDOT Highway Safety Improvement Program (HSIP) annual report provides for a continuous and systematic process that identifies and reviews traffic safety issues around the state. The goal of the HSIP process is to reduce the number of crashes, injuries and fatalities

through the implementation of strategies and countermeasures structured around seven emphasis areas.

- The statewide Texas Transportation Plan 2040 (TTP) summarizes transportation needs across the state and identifies future funding projections for projects across transportation modes over the 25-year plan horizon.
- The SETRPC-MPO JOHRTS MTP-2045 increases the safety of the transportation system for motorized and non-motorized users as required by the Planning Rule. The MTP identifies safety needs within the metropolitan planning area and provides funding for targeted safety improvements.

To support progress towards approved highway safety targets, the Revised JOHRTS FY 2019-2022 Transportation Improvement Program (TIP) includes safety investments.

### **Pavement and Bridge Condition (PM2)**

The FHWA established performance measures to assess pavement and bridge condition for the National Highway Performance Program, effective May 20, 2017. This second FHWA performance measure rule (PM2) established six performance measures:

1. Percent of Interstate pavements in good condition
2. Percent of Interstate pavements in poor condition
3. Percent of non-Interstate National Highway System (NHS) pavements in good condition
4. Percent of non-Interstate NHS pavements in poor condition
5. Percent of NHS bridges by deck area classified as in good condition
6. Percent of NHS bridges by deck area classified as in poor condition

#### ***Pavement Condition Measures***

The pavement condition measures represent the percentage of lane-miles on the Interstate or non-Interstate NHS that are in good condition or poor condition. FHWA established five metrics to assess pavement condition: International Roughness Index (IRI); cracking percent; rutting; faulting; and Present Serviceability Rating (PSR). For each metric, a threshold is used to establish good, fair, or poor condition.

Pavement condition is assessed using these metrics and thresholds. A pavement section is in good condition if three metric ratings are good, and in poor condition if two or more metric ratings are poor. Pavement sections that are not good or poor are considered fair.

The pavement condition measures are expressed as a percentage of all applicable roads in good or poor condition. Pavement in good condition suggests that no major investment is needed. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

#### ***Bridge Condition Measures***

The bridge condition measures represent the percentage of bridges, by deck area, on the NHS that are in good condition or poor condition. The condition of each bridge is evaluated by assessing four bridge components: deck, superstructure, substructure, and culverts. FHWA created a metric rating threshold for each component to establish good, fair, or poor condition. Every bridge on the NHS is evaluated using these component ratings. If the lowest rating of the four metrics is greater than or equal to seven, the structure is classified as good. If the lowest rating is less than or equal to four, the structure is classified as poor. If the lowest rating is five or six, it is classified as fair.

To determine the percent of bridges in good or in poor condition, the sum of total deck area of good or poor NHS bridges is divided by the total deck area of bridges carrying the NHS. Deck area is computed using structure length and either deck width or approach roadway width. Good condition suggests that no major investment is needed. Bridges in poor condition are safe to drive on; however, they are nearing a point where substantial reconstruction or replacement is needed.

### ***Pavement and Bridge Targets***

Pavement and bridge condition performance is assessed and reported over a four-year performance period. The first performance period began on January 1, 2018 and runs through December 31, 2021. The second four-year performance period will cover January 1, 2022, to December 31, 2025, with additional performance periods following every four years.

The PM2 rule requires states and MPOs to establish two-year and/or four-year performance targets for each PM2 measure. Current two-year targets represent expected pavement and bridge condition at the end of calendar year 2019, while the current four-year targets represent expected condition at the end of calendar year 2021.

States establish targets as follows:

- Percent of Interstate pavements in good and poor condition – four-year targets
- Percent of non-Interstate NHS pavements in good and poor condition – two-year and four-year targets
- Percent of NHS bridges by deck area in good and poor condition – two-year and four-year targets

MPOs establish four-year targets for each measure by either agreeing to program projects that will support the statewide targets or setting quantifiable targets for the MPO's planning area that differ from the state targets.

TxDOT established current statewide two-year and four-year PM2 targets on June 21, 2018. The SETRPC-MPO adopted the Texas statewide PM2 targets on November 29, 2018. **Table 2** presents statewide baseline performance for each PM2 measure as well as the current two-year and four-year statewide targets established by TxDOT.

On or before October 1, 2020, TxDOT will provide FHWA a detailed report of pavement and bridge condition performance covering the period of January 1, 2018, to December 31, 2019. TxDOT and the SETRPC-MPO will have the opportunity at that time to revisit the four-year PM2 targets.

**Table 2: Pavement and Bridge Condition (PM2) Performance Targets**

PERFORMANCE MEASURE	STATEWIDE BASELINE	2020 TARGET	2022 TARGET
Pavement on Interstate Highway			
1) Percent in "Good" condition	n/a	n/a	66.4%
2) Percent in "Poor" condition	n/a	n/a	0.3%
Pavement on Non-Interstate National Highway System			
3) Percent in "Good" condition	54.4%	52.0%	52.3%
4) Percent in "Poor" condition	13.8%	14.3%	14.3%
National Highway System Bridge Deck Condition			
5) Percent in "Good" condition	50.63%	50.58%	50.42%
6) Percent in "Poor" condition	0.88%	0.80%	0.80%

The SETRPC-MPO recognizes the importance of linking goals, objectives, and investment priorities to stated performance objectives, and that establishing this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the JOHRTS FY 2019-2022 TIP planning process directly reflects the goals, objectives, performance measures, and targets as they are available and described in other State and public transportation plans and processes; specifically, the current statewide Texas Transportation Plan 2040 (TTP) and the SETRPC-MPO JOHRTS MTP-2045.

- The TTP 2040 summarizes transportation needs across the state and identifies future funding projections for projects across transportation modes over the 25-year plan horizon.
- The SETRPC-MPO JOHRTS MTP-2045 addresses infrastructure preservation and identifies pavement and bridge infrastructure needs within the metropolitan planning area and allocates funding for targeted infrastructure improvements.

To support progress towards TxDOT's statewide PM2 targets, the Revised JOHRTS FY 2019-2022 TIP investments that will maintain pavement and bridge condition performance. Investments in pavement and bridge condition could include pavement replacement and reconstruction, bridge replacement and reconstruction, new bridge and pavement capacity, and system resiliency projects that improve NHS bridge components.

### **Travel Time Reliability (PM3)**

The FHWA established measures to assess performance of the National Highway System and freight movement on the Interstate system, effective May 20, 2017. This third FHWA performance measure rule (PM3) established three performance measures applicable to the SETRPC-MPO, described below.

*National Highway System Performance:*

1. Percent of person-miles on the Interstate system that are reliable
2. Percent of person-miles on the non-Interstate NHS that are reliable

*Freight Movement on the Interstate:*

3. Truck Travel Time Reliability Index (TTTR)

**System Performance Measures**

The two System Performance measures assess the reliability of travel times on the Interstate or non-Interstate NHS system. The performance metric used to calculate reliability is the Level of Travel Time Reliability (LOTTR). LOTTR is defined as the ratio of longer travel times (80th percentile) to a normal travel time (50th percentile) over all applicable roads during four time periods (AM peak, Mid-day, PM peak, and weekends) that cover the hours of 6 AM to 8 PM each day.

The LOTTR ratio is calculated for each segment of applicable roadway, essentially comparing the segment with itself. A segment is deemed to be reliable if its LOTTR is less than 1.5 during all four time periods. If one or more time periods has a LOTTR of 1.5 or above, that segment is unreliable.

The measures are expressed as the percent of person-miles traveled on the Interstate or non- Interstate NHS system that are reliable. Person-miles considers the number of people traveling in buses, cars, and trucks over these roadway segments. To determine total person miles traveled, the vehicle miles traveled (VMT) on each segment is multiplied by average vehicle occupancy. To calculate the percent of person miles traveled that are reliable, the sum of the number of reliable person miles traveled is divided by the sum of total person miles traveled.

***Freight Movement Performance Measures***

The Freight Movement performance measure assesses reliability for trucks traveling on the Interstate. A TTTR ratio is generated by dividing the 95th percentile truck travel time by a normal travel time (50<sup>th</sup> percentile) for each segment of the Interstate system over five time periods throughout weekdays and weekends (AM peak, Mid-day, PM peak, weekend, and overnight) that cover all hours of the day. For each segment, the highest TTTR value among the five time periods is multiplied by the length of the segment. The sum of all length-weighted segments is then divided by the total length of Interstate to generate the TTTR Index.

***P3 Performance Targets***

Performance for the PM3 measures is assessed and reported over a four-year performance period. For the PM3 measures, the first performance period began on January 1, 2018 and will end on December 31, 2021. TxDOT reported baseline PM3 performance and targets to FHWA and will report updated performance information at the midpoint and end of the performance period. The second four-year performance period will cover January 1, 2022, to December 31, 2025, with additional performance periods following every four years.

The PM3 rule requires state DOTs and MPOs to establish two-year and/or four-year performance targets for each PM3 measure. For all targets, the current two-year and four-year targets represent expected performance at the end of calendar years 2019 and 2021, respectively.

States establish targets as follows:

- Percent of person-miles on the Interstate system that are reliable – two-year and four-year targets
- Percent of person-miles on the non-Interstate NHS that are reliable – four-year targets
- Truck Travel Time Reliability – two-year and four-year targets

MPOs establish four-year targets for the System Performance and Freight Movement by establishing targets by either agreeing to programs and projects that will support the statewide targets or setting quantifiable targets for the MPO's planning area that differ from the state targets.

TxDOT enlisted the Texas Transportation Institute (TTI) to establish a statewide methodology and recommend future year travel time reliability performance targets for all MPOs within Texas. The SETRPC-MPO adopted the TxDOT statewide PM3 targets on October 26, 2018. **Table 3** presents statewide baseline performance for each PM3 measure as well as the current two-year and four-year statewide targets established by TTI for TxDOT.

TxDOT will provide FHWA on or before October 1, 2020 a detailed report of PM3 performance covering the period of January 1, 2018 to December 31, 2019. TxDOT and the SETRPC-MPO will have the opportunity at that time to revisit the four-year PM3 targets.

**Table 3: Travel Time Reliability (PM3) Performance and Targets**

PERFORMANCE MEASURE	2017 BASE	2020 TARGET	2022 TARGET RECOMMENDATION
Percent of Person-Miles Traveled on the Interstate System that are Reliable	100%	97%	95%
Percent of Person-Miles Traveled on the Non-Interstate NHS that are Reliable	90%	75%	70%
Truck Travel Time Reliability Index	1.35	1.45	1.50

The SETRPC-MPO recognizes the importance of linking goals, objectives, and investment priorities to stated performance objectives, and that establishing this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the JOHRTS FY 2019-2022 TIP planning process directly reflects the goals, objectives, performance measures, and targets as they are available and described in other State and public transportation plans and processes; specifically, the Texas Freight Mobility Plan, the current statewide Texas Transportation Plan 2040 (TTP), and the JOHRTS MTP-2045.

- The Texas Freight Mobility Plan defines the conditions and performance of the state freight system and identifies the policies and investments that will enhance Texas highway freight mobility well into the future. The Plan identifies freight needs and the criteria Texas will use to determine investments in freight and prioritizes freight investments across modes.
- The TTP 2040 summarizes transportation needs across the state and identifies future funding projections for projects across transportation modes over the 25-year plan horizon.

- The JOHRTS MTP-2045 addresses reliability, freight movement, congestion, and identifies needs for each of these issues within the metropolitan planning area and allocates funding for targeted improvements.

To support progress towards TxDOT's statewide PM3 targets, the Revised JOHRTS FY 2019-2022 TIP devotes resources to projects that will address passenger and highway freight reliability and delay.

### Transit Asset Management Performance Measures and Targets (TAM)

The Federal Transit Administration (FTA) established performance measures to assess the performance of transit assets on July 26, 2016. Each transit provider or Transit Asset Management (TAM) plan sponsor must set performance targets for transit assets.

On August 30, 2018, the SETRPC-MPO JOHRTS Transportation Planning Committee adopted the Transit Asset Management Performance Targets listed in **Table 4** below. These performance targets are applicable to BMT, PAT, and SETT.

The SETRPC-MPO, TxDOT, Beaumont Municipal Transit (BMT), Port Arthur Transit (PAT) and South East Texas Transit (SETT) have signed an MOU defining roles and responsibilities related to the performance-based planning and programming process in compliance with the FAST Act.

**Table 4: Transit Asset Management Performance Measures and Targets**

ASSET CATEGORY	SERVICE AREA	ASSET CLASS	2018 TARGET FOR EXCEEDING USEFUL LIFE BENCHMARK
Rolling Stock	Urban	Buses	25%
		Vans	0%
		Minivans	0%
		Automobiles	0%
		Service Vehicles	50%
	Rural	Cutaway Vans	25%
		Vans	0%
		Automobiles	0%
		Service Vehicles	0%
	Urban	Non-Revenue Utility Vehicles	50%
		Non-Revenue Supervisor Vehicle	50%
	Rural	Non-Revenue Supervisor Vehicle	50%
		Non-Revenue Utility Vehicles	50%
Facility	Urban	Transit Administration & Maintenance Building	25%
		Transit Intermodal Terminal	25%
	Rural	Transit Administration & Maintenance Building	25%
		Transit Intermodal Terminal	25%
Equipment	Urban	Equipment	50%
	Rural	Equipment	50%

The SETRPC-MPO recognizes the importance of linking goals, objectives, and investment priorities to stated performance objectives, and that establishing this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the JOHRTS FY 2019-2022 TIP planning process directly reflects the goals, objectives, performance measures, and targets as they are available and described in other State and public transportation plans and processes; specifically, the current statewide Texas Transportation Plan (TTP) 2040 and the JOHRTS Metropolitan Transportation Plan 2045 (MTP).

- The TTP 2040 summarizes transportation needs across the state and identifies future funding projections for projects across transportation modes over the 25-year plan horizon.
- The JOHRTS MTP-2045 addresses and identifies transit needs within the metropolitan planning area and allocates funding for targeted improvements.

To support progress towards the TAM targets, the Revised JOHRTS FY 2019-2022 TIP devotes resources to projects that will address transit asset management.

As part of the FAST Act, performance measures were incorporated for transit agencies, primarily through the Transit Asset Management (TAM) assessment and planning requirements. The TAM plans for Beaumont Municipal Transit (BMT), Port Arthur Transit (PAT), and South East Texas Transit (SETT) were developed to meet that requirement. All assets owned by BMT, PAT, and SET were examined using the Federal Transit Administration (FTA) Transit Economic Requirements Model (TERM) which uses a scale of one to five to determine the quality of the asset. The scale is as follows:

1 = Poor	The asset is critically damaged or in need of immediate repair; well past useful life.
2 = Marginal	Defective or deteriorated in need of replacement; exceeded useful life.
3 = Adequate	Moderately deteriorated or defective; has not exceeded useful life.
4 = Good	Good condition, no longer new, may be slightly defective/deteriorated but is functional.
5 = Excellent	No visible defects, new or near new, may still be under warranty if applicable.

An asset is deemed to be in good repair if it has a rating of 3, 4, or 5 on this scale. Likewise, a facility is deemed to not be in good repair if it has a rating of 1 or 2. Using this scale, BMT, PAT, and SETT examined revenue vehicles, non-revenue vehicles and facilities. Based on the rating, BMT, PAT, and SETT developed investment priorities. The SETRPC-MPO incorporated these investment priorities into the TAM performance targets which the Transportation Planning Committee adopted on August 30, 3018.

Upon adoption of the FAST Act, a direct correlation between safety targets and TAM plans needed to be established through project selection as reflected in the Transportation Improvement Programs (TIPs). By rule, TIPs amended or updated on or after 5/27/2018 must meet the Performance-Based Planning and Programming (PBPP) planning requirements [81 FR 34050] for the safety performance measures. TIPs amended or updated on or after 10/1/2018 must meet the PBPP planning requirements for FTA's Transit Asset Management Final Rule. A narrative must be developed to show how projects included in the SETRPC-MPO JOHRTS FY 2019-20122 TIP help achieve safety, bridge, pavement, travel time reliability targets, and TAM plan requirements.

## The JOHRTS FY 2019 – FY 2022 Transportation Improvement Program

The SETRPC MPO staff have reviewed projects in the TIP for compliance with four performance measures as mandated by federal law. The four performance measures are safety (defined as projects which help reduce fatalities and serious injuries for vehicles and non-motorized modes of transportation), bridge deck condition, Non-Interstate National Highway System Pavement Condition, and travel time reliability. In addition, the TIP and any amendments to the TIP were reviewed to determine their relevance to the Transit Asset Management Plan developed for Beaumont Municipal Transit (BMT), Port Arthur Transit (PAT), and South East Texas Transit (SETT).

### **THE “DRAFT” REVISED JOHRTS FY 2019-2022 TRANSPORTATION IMPROVEMENT PROGRAM**

Because the JOHRTS Area Metropolitan Transportation Plan (MTP) 2045 included selection criteria based on safety, most of the highway projects included in the TIP have significant impact on improving safety and travel time reliability, and thus help work towards the safety and travel time reliability targets. These projects include:

- US 69 between Tram Road south and the LNVA Canal – widen from 4 to 6 lanes. The facility will be upgraded to current design and safety standards which will improve driver comfort level and mobility. Instances of stopped or slowed vehicles due to multiple access points will be greatly reduced with the added new lanes. The merging and diverging operations near on or off ramps between frontage roads and US 69 will be greatly improved with a strengthened median barrier.
- US 69 at SH 73. The facility will be upgraded to current design and safety standards which will improve driver comfort level and mobility. A reduction in instances of stopped or slowed vehicles at connection points inside the interchange is expected as a result of the improved merging operations. The constructed flyovers are expected to result in a reduction in vehicle collisions.
- US 69, Tyler County line to 0.75 miles south of FM 1003. The facility will be upgraded to current design and safety standards which will improve driver comfort level and mobility. Current instances of stopped or slowed vehicles on the main lanes is expected to be reduced, thus lessening chances of rear-end collisions. In addition, the proposed improvements are expected to increase mobility along a route that delivers military vehicles and equipment to the Port of Beaumont for transport and provides hurricane evacuation for south Jefferson County. This improvement is a new 4 lane divided facility with a median barrier.
- US 69 from FM 421, south to US 96. Widen existing highway to 4 lanes with a continuous left turn lane. The facility will be upgraded to current design and safety standards.
- IH-10 from the Hollywood overpass, east to 7<sup>th</sup> Street. Widen the freeway to 6 main lanes and reconstruct Interchange. The facility will be upgraded to current design and safety standards which will improve driver comfort level and mobility. Current instances of stopped or slowed vehicles on the main lanes is expected to be reduced, therefore occurrence of rear-end collisions is expected to be reduced.

- SH 105 from .10 miles east of SH 326 to Pine Island Bayou. The facility will be upgraded to current design and safety standards which will improve driver comfort level and mobility. Instances of stopped or slowed vehicles due to multiple access points is expected to be reduced with the added new lanes and a CLT or a depressed median with turn lanes.
- IH-10, Jefferson County, from CR 131 (Walden Road) east to US 90. The facility will be upgraded to current design and safety standards.FM 365 at Pignut Gully. Replace bridge and approaches. The facility will be upgraded to current design and safety standards.
- FM 365 at Rhodair Gully. Bridge rehabilitation. The facility will be upgraded to current design and safety standards.
- US 69 at FM 421. Improve traffic signals. The facility will be upgraded to current design and safety standards.
- SH 87 at Park Avenue. Improve traffic signals. The facility will be upgraded to current design and safety standards.
- SH 87 at BU90Y. Improve traffic signals. The facility will be upgraded to current design and safety standards.
- FM 366 at Hogaboom Road. Improve traffic signals. The facility will be upgraded to current design and safety standards.
- Regarding bridge deck targets, the TIP contains the following projects;
  - Old Highway 90 at Bairds Bayou. Replace bridge and approaches. The facility will be upgraded to current design and safety standards.
  - US 69 at the LNVA Canal. Upgrade bridge and approaches. The facility will be upgraded to current design and safety standards.
  - US 69 at Airport Road. Upgrade bridge and approach railing. The facility will be upgraded to current design and safety standards.
  - US 69 at Nederland Avenue. Upgrade bridge and approach railing. The facility will be upgraded to current design and safety standards.

Based on the Beaumont Municipal Transit (BMT) Transit Asset Management (TAM) plan and the available budget, projects included in the FY 2019 – FY 2022 Transportation Improvement Program that address TAM requirements include:

- Combined funds totaling \$5,300,000 in FY 2019 for operations and maintenance to maintain the existing transit assets in a State of Good Repair (SGR);
- Combined funds totaling \$5,350,000 in FY 2020 for operations and maintenance to maintain the existing transit assets in a SGR;
- Combined funds totaling \$5,450,000 in FY 2021 for operations and maintenance to maintain the existing transit assets in a SGR;
- Combined funds totaling \$5,550,000 in FY 2022 for operations and maintenance to maintain the existing transit assets in a SGR.

Based on the Port Arthur Transit (PAT) TAM plan and the available budget, projects included in the FY 2019 – FY 2022 Transportation Improvement Program that address TAM requirements include:

- Combined funds totaling \$2,076,239 in FY 2019 for operations and maintenance to maintain the existing transit assets in a SGR;
- Bus replacements in FY 2019 totaling \$883,413 to retire 8 paratransit buses and 2 support vehicles from PAT fleet;
- \$50,697 in FY 2019 for facility enhancements and terminal upgrade;
- \$1,668,000 in FY 2019 to upgrade facilities with route charger;
- Combined funds totaling \$2,076,239 in FY 2020 for operations and maintenance to maintain the existing transit assets in a SGR;
- Bus replacements in FY 2020 totaling \$2,292,834 to replace 4 transit buses with electric buses;
- Combined funds totaling \$2,076,239 in FY 2021 for operations and maintenance to maintain the existing transit assets in a SGR;
- Combined funds totaling \$2,076,239 in FY 2022 for operations and maintenance to maintain the existing transit assets in a SGR.

Revised JOHRTS FY 2019-2022 Transportation Improvement Program Amendment 1

These projects address the Port Arthur Transit (PAT) Asset Management Plan (TAM) requirements include;

- \$253,483 in FY 2019 for facility enhancements and terminal upgrades to maintain the existing transit assets in a SGR;
- \$190,112 in FY 2019 to acquire shop equipment to maintain the existing transit assets in a SGR;
- \$1,650,000 in FY 2019 for construction of a new maintenance facility to maintain the existing transit assets in a SGR;
- Bus replacements in FY 2020 totaling \$2,243,000 to purchase 4 electric buses, charging equipment, and facility modifications to maintain the existing transit assets in a SGR;
- \$904,750 in FY 2020 to repair/replace storm water liners adjacent to downtown transit facilities to help mitigate future flooding events to maintain the existing transit assets in a SGR.

Based on the South East Texas Transit (SETT) TAM plan and the available budget, projects included in the FY 2019 – FY 2022 Transportation Improvement Program that address TAM requirements include:

- Combined funds totaling \$1,129,637 in FY 2019 for operations and maintenance to maintain the existing transit assets in a SGR;
- Bus replacements in FY 2019 totaling \$1,200,000 to replace 15 transit buses with alternatively fueled vehicles;
- Combined funds totaling \$1,129,637 in FY 2020 for operations and maintenance to maintain the existing transit assets in a SGR;
- Combined funds totaling \$1,129,637 in FY 2021 for operations and maintenance to maintain the existing transit assets in a SGR;
- Combined funds totaling \$1,129,637 in FY 2022 for operations and maintenance to maintain the existing transit assets in a SGR.

## Project Contribution to Performance Targets

The table below shows the projects programmed in the JOHRTS FY 2019-2022 TIP, the Draft Revised JOHRTS FY 2019-2022 TIP Amendment 1, and the targets that they are anticipated to positively affect. By agreeing to support the TxDOT performance targets in the area of safety (PM1), pavement and bridge condition (PM2), travel time reliability (PM3), and TA requirements, the SETRPC-MPO has agreed to coordinate with TxDOT to program projects that will contribute to the accomplishment of those goals, measures, and targets.

### *Project Contribution to Performance Targets*

MPO ID	Hwy No	Limits From	Limits To	Description	PM1	PM2	PM3	TAM
02002-F40N	US 69	Tram Rd, South	LNVA Canal	Widen freeway from 4 to 6 lanes	X	X	X

# We Value Your Input

## Metropolitan Transportation Plan 2045 Jefferson-Orange-Hardin Transportation Study (JOHRTS) Area

Please join us for a meeting on the metropolitan transportation plan, the transportation improvement program and transportation conformity for Southeast Texas!

Learn about the *planning process*, identify *transportation issues* in the region, and provide your input on *what you want to see in the future*.

The public review and comment period will be held **May 31 - July 1, 2019**.

The South East Texas Regional Planning Commission - Metropolitan Planning Organization is responsible for planning transportation improvements in Hardin, Jefferson, and Orange Counties, and we hope to hear from you.

*Please attend any meeting to provide your input or submit written comments by 5:00 PM on July 1, 2019 to:*

**Bob Dickinson**

**[bdickinson@setrpc.org](mailto:bdickinson@setrpc.org)**

**2210 Eastex Freeway, Beaumont, Texas 77703**

All Comments received will be addressed and provided to the Transportation Planning Committee for consideration.

*For special requests, please contact Bob Dickinson at least 48 hours in advance at 409-899-8444 x7520 or [bdickinson@setrpc.org](mailto:bdickinson@setrpc.org).*

### MONDAY

**June 3, 3 - 5 PM**

City of Orange Library  
220 5th Street Orange,  
TX

### TUESDAY

**June 4, 3 - 5 PM**

Lumberton City Hall 836  
North Main Street  
Lumberton, TX

### WEDNESDAY

**June 5, 3 - 5 PM**

Bowers Convention Center  
3401 Cultural Center Drive  
Port Arthur, TX

### THURSDAY

**June 6, 3 - 5 PM**

South East Texas  
Planning Commission  
2210 Eastex Freeway  
Beaumont, TX

**FOR IMMEDIATE RELEASE**

May 30, 2019

**Public Encouraged to Provide Comments on the “draft” JOHRTS MTP-2045  
and the “draft” JOHRTS FY 2019-2022 TIP, Amendment #1**

*“SETRPC to Host Series of Public Meetings beginning Monday, June 3rd”*

(Beaumont) --- The South East Texas Regional Planning Commission (SETRPC) will host a series of public meetings beginning **Monday, June 3, 2019**, providing citizens in Jefferson, Orange and Hardin Counties the opportunity to learn about and comment on the “draft” **JOHRTS MTP-2045, the “draft” JOHRTS FY 2019-2022 TIP, Amendment #1, and Transportation Conformity**. “This is an opportunity for the public to be directly involved in the process and have their voices heard as we make recommendations to address transportation-related issues that are affecting the southeast Texas region. Public input is an essential part of this process and we want to make sure the needs of our region are properly addressed,” says Bob Dickinson, Director of Transportation and Environmental Resources for SETRPC.

The 32-day public comment period is being held May 31 through July 1, 2019. The public is encouraged to attend a meeting or provide written comments by 5:00 PM, July 1, 2019. Four public meetings will be held in **Orange, Lumberton, Port Arthur, and Beaumont** at the following locations:

**Monday, June 3, 2019 - 3:00 PM**

Orange Public Library, 220 5th Street, Orange, TX

**Tuesday, June 4, 2019 - 3:00 PM**

Lumberton City Hall, 836 North Main Street, Lumberton, TX

**Wednesday, June 5, 2019 - 3:00 PM**

Bowers Civic Center, 3401 Cultural Drive, Port Arthur, TX

**Thursday, June 6, 2019 - 3:00 PM**

South East Texas Regional Planning Commission, 2210 Eastex Freeway, Beaumont, TX

These meetings are designed to solicit the public’s ideas and input on the “draft” JOHRTS MTP-2045, the “draft” JOHRTS FY 2019-2022 TIP, Amendment #1, and Transportation Conformity for the southeast Texas area. All meetings are the same and are not restricted to a specific area. The public is strongly encouraged to be an active part of this process by selecting a meeting day and time that fits their schedule. For more information or for special needs requests (48 hours), please contact **Bob Dickinson** at (409) 899-8444 extension 7520 or [bdickinson@setrpc.org](mailto:bdickinson@setrpc.org).

*SETRPC is designated as the Metropolitan Planning Organization (MPO) for the Jefferson-Orange-Hardin Regional Transportation Study (JOHRTS) area. SETRPC, in conjunction with the Texas Department of Transportation, local governments and other interested parties, facilitates the regional multi-modal transportation planning process.*

## We Value Your Input!

The South East Texas Regional Planning Commission (SETRPC) is the designated Metropolitan Planning Organization (MPO) for the Jefferson-Orange-Hardin Regional Transportation Study (JOHRTS) area, comprised of Jefferson, Orange and Hardin Counties. In conjunction with the Texas Department of Transportation, the SETRPC-MPO is responsible for an overall plan that identifies the most desirable and efficient means of meeting transportation needs for the next twenty years.

As part of the continuing, cooperative, and comprehensive transportation planning process, the SETRPC-MPO will be hosting a series of public meetings to provide the public an overview of and an opportunity to comment on the “draft” JOHRTS MTP-2045, the “draft” JOHRTS FY 2019-2022 TIP, Amendment #1, and Transportation Conformity, which contains projects and programs scheduled for implementation in the future.

## Public Notices

### We Value Your Input!

The South East Texas Regional Planning Commission (SETRPC) is the designated Metropolitan Planning Organization (MPO) for the Jefferson-Orange-Hardin Regional Transportation Study (JOHRTS) area, comprised of Jefferson, Orange and Hardin Counties. In conjunction with the Texas Department of Transportation, the SETRPC-MPO is responsible for an overall plan that identifies the most desirable and efficient means of meeting transportation needs for the next twenty years.

As part of the continuing, cooperative, and comprehensive transportation planning process, the SETRPC-MPO will be hosting a series of public meetings to provide the public an overview of and an opportunity to comment on the "draft" JOHRTS MTP-2045, the "draft"

# **MPO SELF-CERTIFICATION**

## **REVISED FY 2019 -2022**

TEXAS DEPARTMENT OF TRANSPORTATION  
MPO SELF-CERTIFICATION

In accordance with 23 CFR Part 450.336 and 450.220 of the Fixing America's Surface Transportation Act (FAST Act); the Texas Department of Transportation, and the Beaumont-Port Arthur Metropolitan Planning Organization for the Beaumont-Port Arthur urbanized area(s) hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

1. [23 U.S.C. 134](#), [49 U.S.C. 5303](#), and this subpart;
2. Title VI of the Civil Rights Act of 1964, as amended ( [42 U.S.C. 2000d-1](#)) and [49 CFR part 21](#);
3. [49 U.S.C. 5332](#), prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
4. Section 1101(b) of the FAST Act ( [Pub. L. 114-357](#)) and [49 CFR part 26](#) regarding the involvement of disadvantaged business enterprises in DOT funded projects;
5. [23 CFR part 230](#), regarding the implementation of an [equal employment opportunity program](#) on Federal and Federal-aid [highway](#) construction contracts;
6. The provisions of the Americans with Disabilities Act of 1990 ( [42 U.S.C. 12101 et seq.](#)) and [49 CFR parts 27, 37, and 38](#) ;
7. The Older Americans Act, as amended ( [42 U.S.C. 6101](#)), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
8. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
9. Section 504 of the Rehabilitation Act of 1973 ( [29 U.S.C. 794](#)) and [49 CFR part 27](#) regarding discrimination against individuals with disabilities.
